

- Score on the GRE (test)
- Class rank (1-4)

First, let's start by looking at the data. For that, we'll use the `read_csv` function in `pandas`.

```
import pandas as pd
data = pd.read_csv('student_data.csv')
print(data)
```

	admit	gre	gpa	rank
0	0	380	3.61	3
1	1	660	3.67	3
2	1	800	4.00	1
3	1	640	3.19	4
4	0	520	2.93	4
5	1	760	3.00	2
6	1	560	2.98	1
7	0	400	3.08	2
8	1	540	3.39	3
9	0	700	3.92	2
