Perceptrons as Logical Operators

In this lesson, we'll see one of the many great applications of perceptrons. As logical operators! You'll have the chance to create the perceptrons for the most common of these, the **AND**, **OR**, and **NOT** operators. And then, we'll see what to do about the elusive **XOR** operator. Let's dive in!

AND Perceptron

IN	IN	OUT
1	1	1
1	0	0
0	1	0
0	0	0
